Grand Unified Theory of Uncertainty???

<http://decisions-and-info-gaps.blogspot.com>

§ Main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
-

§ Main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- What's the relation between
 - **uncertainty** and **reality**?
 -

§ Main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
 -

§ Main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
 - (Note parallel to relation between:
meaning and **truth**.)

-

§ Main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
 - (Note parallel to relation between:
meaning and **truth**.)
- Should we aim for **1 unified theory of uncertainty???**
Why not?

2 *Scientists, Logicians, and Saints*

We start by considering **3** ways of looking at the world.

§ **Physicist rejects theory that contradicts observation.**

- Popper: falsifiability.
- Theories are **disproven**, not **proven**.

§

§ **Physicist rejects theory that contradicts observation.**

- Popper: falsifiability.
- Theories are **disproven**, not **proven**.

§ **Logician rejects statement that contradicts axioms.**

“a paradox has the same significance for the logician as the smell of burning rubber for the electronics engineer.”¹

§

¹Peter Medawar, *Pluto's Republic*, Oxford University Press, 1982, p 309.

§ **Physicist rejects theory that contradicts observation.**

- Popper: falsifiability.
- Theories are **disproven**, not **proven**.

§ **Logician rejects statement that contradicts axioms.**

“a paradox has the same significance for the logician as the smell of burning rubber for the electronics engineer.”²

§ **Saint rejects action that contradicts morality.**

§

²Peter Medawar, *Pluto's Republic*, Oxford University Press, 1982, p 309.

§ **Physicist rejects theory that contradicts observation.**

- Popper: falsifiability.
- Theories are **disproven**, not **proven**.

§ **Logician rejects statement that contradicts axioms.**

“a paradox has the same significance for the logician as the smell of burning rubber for the electronics engineer.”³

§ **Saint rejects action that contradicts morality.**

§ Are there **conflicts** between these world views?

§

³Peter Medawar, *Pluto's Republic*, Oxford University Press, 1982, p 309.

§ **Physicist rejects theory that contradicts observation.**

- Popper: falsifiability.
- Theories are **disproven**, not **proven**.

§ **Logician rejects statement that contradicts axioms.**

“a paradox has the same significance for the logician as the smell of burning rubber for the electronics engineer.”⁴

§ **Saint rejects action that contradicts morality.**

§ Are there **conflicts** between these world views?

§ What is **your** world view?

⁴Peter Medawar, *Pluto's Republic*, Oxford University Press, 1982, p 309.

§ About science:

- Do scientists **believe** in something?
-

§ About science:

- Do scientists **believe** in something?
- **Inconsistency can be removed from science**
if world is **one coherent whole**.
-

§ About science:

- Do scientists **believe** in something?
- **Inconsistency** can be removed from science if world is **one coherent whole**.
- Belief in **one coherent world** and **Grand Unified Theory** is modern secular version of belief in **one universal God**.

§

§ About science:

- Do scientists **believe** in something?
- **Inconsistency** can be removed from science if world is **one coherent whole**.
- Belief in **one coherent world** and **Grand Unified Theory** is modern secular version of belief in **one universal God**.

§ Recall our first question:

- Physicists seek 1 **Grand Unified Theory**. Why?
-

§ About science:

- Do scientists **believe** in something?
- **Inconsistency** can be removed from science if world is **one coherent whole**.
- Belief in **one coherent world** and **Grand Unified Theory** is modern secular version of belief in **one universal God**.

§ Recall our first question:

- Physicists seek 1 **Grand Unified Theory**. Why?
- Answer: belief in **one coherent world**.

§ Our other questions:

- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
- Should we aim for **1 unified theory of uncertainty???**
Why not?

3 *Jabberwocky*

Jabberwocky⁵

“Twas brillig, and the slithy toves
Did gyre and gimble in the wabe:
All mimsy were the borogoves,
And the mome raths outgrabe.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

...

Lewis Carroll, 1872.

§

⁵<http://www.jabberwocky.com/carroll/jabber/jabberwocky.html>

Jabberwocky

“Twas brillig, and the slithy toves
Did gyre and gimble in the wabe:
All mimsy were the borogoves,
And the mome raths outgrabe.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

...

Lewis Carroll, 1872.

§ ‘Brillig’, ‘slithy’, ‘mimsy’, ‘outgrabe’ are **not words**.

§

Jabberwocky

“Twas brillig, and the slithy toves
Did gyre and gimble in the wabe:
All mimsy were the borogoves,
And the mome raths outgrabe.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

...

Lewis Carroll, 1872.

§ ‘Brillig’, ‘slithy’, ‘mimsy’, ‘outgrabe’ are **not words**.

§ **Nonsense poem** tells story, creates atmosphere.

§

Jabberwocky

“Twas brillig, and the slithy toves
Did gyre and gimble in the wabe:
All mimsy were the borogoves,
And the mome raths outgrabe.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

...

Lewis Carroll, 1872.

- § ‘Brillig’, ‘slithy’, ‘mimsy’, ‘outgrabe’ are **not words**.
- § **Nonsense poem** tells story, creates atmosphere.
- § **Imagination exceeds reality**.

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
-

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§ Example of “impossibility”:

Given a line, and a point not on line,
there are 2 lines through the point,
both parallel to the given line.

§

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§ Example of “impossibility”:

Given a line, and a point not on line,
there are 2 lines through the point,
both parallel to the given line.

§ **Impossible** in Euclidean geometry.

Impossible in the real world?

§

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§ Example of “impossibility”:

Given a line, and a point not on line,
there are 2 lines through the point,
both parallel to the given line.

§ **Impossible** in Euclidean geometry.

Impossible in the real world?

§ **Axiomatic** in Lobachevskian geometry.

Applied in general relativity.

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§ Example of “impossibility”:

Sail in ‘straight line’ until you return home.

§

§ Thinking “outside the box”.

- Put ideas together **surprisingly**. E.g. creative design.
- Think “impossibilities”, “contradictions”.

§ Example of “impossibility”:

Sail in ‘straight line’ until you return home.

§ Ferdinand Magellan circumnavigated the globe, 1519–1522.

§ Can you think **incoherent, erroneous** thoughts?

§

§ Can you think **incoherent, erroneous** thoughts?

§ To get started, try

“two meanings packed into one word

like a portmanteau”:

○ ‘**fuming**’ and ‘**furious**’ to get ‘**frumious**’⁶

○

⁶<http://www.literature.org/authors/carroll-lewis/the-hunting-of-the-snark/preface.html>

§ Can you think **incoherent, erroneous** thoughts?

§ To get started, try

“two meanings packed into one word
like a portmanteau”:

- ‘fuming’ and ‘furious’ to get ‘frumious’⁷
- ‘snake’ and ‘shark’ to get ‘snark’.⁸

⁷<http://www.literature.org/authors/carroll-lewis/the-hunting-of-the-snark/preface.html>

⁸<http://www.literature.org/authors/carroll-lewis/the-hunting-of-the-snark>

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Thingk**’.

When I **think** a **thing** I’ve thought,

...

§ Portmanteau words are a start.

§ Now try Portmanteau thoughts. E.g. ‘Thinkk’.

When I think a thing I’ve thought,
I have often felt I ought
To call this thing I think a “Thinkk”,
Which ought to save a lot of ink.

...

§ Two thoughts at once. No problem.

§

§ Portmanteau words are a start.

§ Now try Portmanteau thoughts. E.g. ‘Thinkk’.

When I think a thing I’ve thought,
I have often felt I ought
To call this thing I think a “Thinkk”,
Which ought to save a lot of ink.

...

§ Two thoughts at once. No problem.

§ Now try 2 contradictory thoughts at once.

E.g.

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘un**think**kable’.

§

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘**unthink**able’.

§ **We can think many contradictions:**

- 4-sided triangles.

-

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘**unthink**able’.

§ **We can think many contradictions:**

- 4-sided triangles.
- Intersecting parallel lines.
-

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘**unthinkable**’.

§ **We can think many contradictions:**

- 4-sided triangles.
- Intersecting parallel lines.
- Super-girls like Pippi Longstockings.
-

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘**unthinkable**’.

§ **We can think many contradictions:**

- 4-sided triangles.
- Intersecting parallel lines.
- Super-girls like Pippi Longstockings.
- Life on Mars.
-

§ **Portmanteau words** are a start.

§ Now try **Portmanteau thoughts**. E.g. ‘**Think**’.

When I **think** a **thing** I’ve thought,
I have often felt I ought
To call this thing I think a “**Think**”,
Which ought to save a lot of ink.

...

§ **Two thoughts at once**. No problem.

§ Now try **2 contradictory thoughts at once**.

E.g. thinking the unthinkable, which is ‘**unthink**able’.

§ **We can think many contradictions:**

- 4-sided triangles.
- Intersecting parallel lines.
- Super-girls like Pippi Longstockings.
- Life on Mars.
- Extra-sensory perception. (Not a contradiction?)

§ Contradictions:

- **Immoral** for the saint.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
- Some ‘**contradictions**’ may be **reconciled**.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
- Some ‘**contradictions**’ may be **reconciled**.
- **Necessary** for the inventor, scholar, searcher of truth.

Examples:

○

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
- Some '**contradictions**' may be **reconciled**.
- **Necessary** for the inventor, scholar, searcher of truth.

Examples:

- **Detective** looks for contradictions in evidence.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
- Some '**contradictions**' may be **reconciled**.
- **Necessary** for the inventor, scholar, searcher of truth.

Examples:

- **Detective** looks for contradictions in evidence.
- **Physicist** looks for data-theory contradictions.
-

§ Contradictions:

- **Immoral** for the saint.
- **Impossible** for the physicist.
- **Illogical** for the logician.
- **Possible** and **necessary** for the thinker.
- Some ‘**contradictions**’ may be **reconciled**.
- **Necessary** for the inventor, scholar, searcher of truth.

Examples:

- **Detective** looks for contradictions in evidence.
- **Physicist** looks for data-theory contradictions.
- **Designer** thinks outside the box.

§ Recall our main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- Answer: belief in **one coherent world**.
-

§ Recall our main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- Answer: belief in **one coherent world**.
- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
 - (Note parallel to relation between:
meaning and **truth**.)
-

§ Recall our main questions:

- Physicists seek **1 Grand Unified Theory**. Why?
- Answer: belief in **one coherent world**.
- What's the relation between
 - **uncertainty** and **reality**?
 - **imagination** and **reality**?
 - (Note parallel to relation between:
meaning and **truth**.)
- Should we aim for
1 unified theory of uncertainty???
Why not?

4 *Images and Arguments*

§ Conflicting conceptions needed when

we can't (yet?) reconcile:

- QM and general relativity.

§ Conflicting conceptions needed when

we can't (yet?) reconcile:

- QM and general relativity.
- Multiple (or no) parallel lines.
-

§ Conflicting conceptions needed when

we can't (yet?) reconcile:

- QM and general relativity.
- Multiple (or no) parallel lines.
- Pippi's strength and muscle physiology.
-

§ **Conflicting conceptions needed when**

we can't (yet?) reconcile:

- QM and general relativity.
- Multiple (or no) parallel lines.
- Pippi's strength and muscle physiology.
- . . .

§

§ Conflicting conceptions needed when

we can't (yet?) reconcile:

- QM and general relativity.
- Multiple (or no) parallel lines.
- Pippi's strength and muscle physiology.
- ...

§ Henry Adams:

“Images are not arguments, rarely even lead to proof, but the mind craves them. ...”

§ Conflicting conceptions needed when

we can't (yet?) reconcile:

- QM and general relativity.
- Multiple (or no) parallel lines.
- Pippi's strength and muscle physiology.
- ...

§ Henry Adams:

“Images are not arguments, rarely even lead to proof, but the mind craves them. ... The keenest experimenters find 20 images better than one, especially if contradictory”.

§ Relation between uncertainty, imagination and reality?

§

§ Relation between uncertainty, imagination and reality?

§ Uncertainty is necessary:

- In realm of unresolved questions where
 - Scientists seek truth. Planck and ∞ blackbody rad.
 -

§ Relation between uncertainty, imagination and reality?

§ Uncertainty is necessary:

- In realm of unresolved questions where
 - Scientists seek truth. Planck and ∞ blackbody rad.
 - Logicians seek consistency. Barber's paradox.
 -

§ Relation between uncertainty, imagination and reality?

§ Uncertainty is necessary:

- In realm of unresolved questions where
 - Scientists seek truth. Planck and ∞ blackbody rad.
 - Logicians seek consistency. Barber's paradox.
 - Saints seek morality. Killing vs. murder.
-

§ Relation between uncertainty, imagination and reality?

§ Uncertainty is necessary:

- In realm of **unresolved questions** where
 - Scientists **seek** truth. Planck and ∞ blackbody rad.
 - Logicians **seek** consistency. Barber's paradox.
 - Saints **seek** morality. Killing vs. murder.
- In realm of **imagination** and the **unknown**
 - Scientists **seek** new theories. QM.
 -

§ Relation between uncertainty, imagination and reality?

§ Uncertainty is necessary:

- In realm of **unresolved questions** where

§ Is “**wrong**” the same as “**useless**”?

§ Grand Unified Theory (GUT):

- Science **can** be a GUT.
-

§ Can a theory of uncertainty be **wrong**?

§ **How do you decide** if an uncertainty theory is **wrong** or **useless**?

§ Is “**wrong**” the same as “**useless**”?

§ Grand Unified Theory (GUT):

- Science **can** be a GUT.
- Uncertainty **can't** be a GUT.
-
